SI SOLAIRE INTELLIGENCE

YOUR POOL, ON AUTOPILOT

SI-Pool

Stop fiddling. Start swimming.

SI-Pool runs the pump on the right schedule, keeps the water at the temperature you've asked for, watches the filter for you and gives you a friendly dashboard you can open from anywhere.

First year of remote access on us. Wi-Fi optional, sanity included.

From the lounge or the airport
Live temp · Schedule · Heater · Filter · Pump safety

For homeowners, holiday homes & smart-home enthusiasts
solaire-intelligence.co.za

STOP TIMING. START SWIMMING.

Your pool, sorted.

Pool ownership shouldn't be a part-time job. SI-Pool quietly looks after the boring bits — running the pump on schedule, watching the filter, keeping the water warm — so you only hear from it when something actually needs your attention. And when you want to make a change, the dashboard is on your phone, not behind the gate.

• ALWAYS THE RIGHT TEMP

Set your target temperature and forget about it. SI-Pool nudges the heat pump on and off so the water's ready when you are.

• THE PUMP RUNS ITSELF

Two daily run-windows handle filtration on autopilot. Run-now and off buttons are right there if you want a quick override before a swim.

• CATCH PROBLEMS EARLY

SI-Pool watches the pump and the filter for you. A dirty filter or a dry pump gets a heads-up the same day — long before they get expensive.

• FROM ANYWHERE

On the home network, open **si-pool.local**. Out and about, the same dashboard is on your phone over a secure remote link — **first year on us**.

• PRIVATE BY DESIGN

Local-first. The dashboard runs on the device itself; nothing leaves your network unless you're viewing it remotely. No data sold, no ads, ever.

• PLAYS NICE WITH SMART HOMES

Already on Home Assistant? SI-Pool slots straight in — every reading and switch shows up automatically, no YAML required.

PERFECT FOR

Family pools · Holiday homes · Estate & cluster pools · Solar-heated pools · Smart-ho

If you own a pool, SI-Pool pays for itself the first time it catches a problem.

Runs locally. Optional Home Assistant. SI-Pool is its own little dashboard — open **http://si-pool.local** on any device on your home Wi-Fi and you have full control, no cloud needed. The same dashboard is available remotely over a secure link, **included for the first year**. If you're already on Home Assistant, the integration is automatic.

HOW IT WORKS

Simple to live with. Clever where it counts.

A neat box on the wall in your plant room switches the pump, the pool light and the heat pump for you. It reads the water temperature off a stainless-steel probe and uses a small current sensor to watch the pump — so it can tell when the filter is clogging or when something's wrong before you do. The dashboard is friendly, on your phone, and works at home or away.

WHAT'S IN THE BOX

Everything you need

- Weatherproof IP65 SI-Pool controller
- Stainless-steel temperature probe in a stainless thermowell
- Sealed cable glands for pump, light and heat-pump cables
- Built-in pump current sensor — gives SI-Pool its sense of pump health
- Friendly setup guide (UI, remote access, Home Assistant)

WHAT YOU'LL NEED AT HOME

Just the basics

- A pool with a single-phase pump
- A pool light or heat pump (optional, but supported)
- A normal 220 V supply in your plant room
- Wi-Fi reaching the plant room

THE PLAIN FACTS

Plain-English specs

Works with	Single-phase pumps, pool lights and heat pumps
Where it goes	Mounted in your plant room, weatherproof
Power	Standard 220 V supply, charger-level standby
Talks over	Your home 2.4 GHz Wi-Fi
Local dashboard	http://si-pool.local
Remote access	First year on us — no port-forwarding needed
Smart home	Plays nicely with Home Assistant
Privacy	Local-first. Your pool data stays on your network
Warranty	12-month limited warranty
Made in	South Africa
