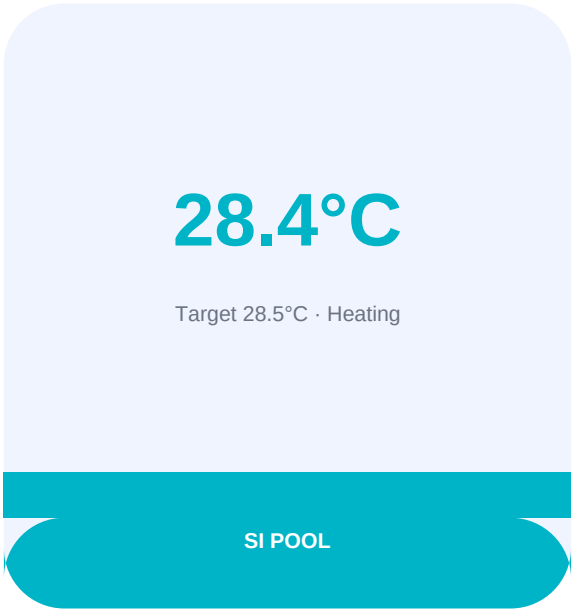
SOLAIRE INTELLIGENCE

YOUR POOL, ON AUTOPILOT

# SI-Pool Stop fiddling. Start swimming.

SI Pool runs the pump on the right schedule, keeps the water at the temperature you've asked for, watches the filter and gives you live control in the SI app from anywhere. ECM-aware scheduling when SI Gateway is present.

- 28.4°C
- Target 28.5°C · Heating
- Schedule
- Filter



**From the lounge or the airport**

Schedule · Filter · Pump safety

For homeowners, holiday homes &

smart-home enthusiasts

**solaire-intelligence.co.za**

STOP TIMING. START SWIMMING.

# Your pool, sorted.

Pool ownership shouldn't be a part-time job. SI Pool quietly looks after the boring bits — running the pump on schedule, watching the filter, keeping the water warm, and now using your solar energy intelligently via ECM — so you only hear from it when something needs your attention.

**ALWAYS THE RIGHT TEMP**
Set your target and forget it. SI Pool nudges the heat pump on and off so the water's ready when you are.

**THE PUMP RUNS ITSELF**
Two daily run-windows handle filtration on autopilot. Run-now and off buttons are right there for quick overrides.

**CATCH PROBLEMS EARLY**
SI Pool watches the pump current. A dirty filter or a dry pump gets a heads-up the same day — long before they get expensive.

**ECM-AWARE SCHEDULING**
When SI Gateway is present, SI Pool reads the ECM score and schedules smarter — longer runs on solar surplus, conservative on tight days.

**FROM ANYWHERE**
Open the Solaire Intelligence app on your iPhone. Live temp, schedule, heater status and controls — from home or the airport.

**PLAYS NICE WITH SMART HOMES**
Already on Home Assistant? SI Pool slots straight in — every reading and switch shows up automatically, no YAML required.

**PERFECT FOR**
**Family pools · Holiday homes · Estate & cluster pools · Solar-heated pools · Smart-home enthusiasts**
If you own a pool, SI Pool pays for itself the first time it catches a problem.

**Runs locally. Optional Home Assistant.** SI Pool is its own dashboard — open **http://si-pool.local** on any device at home. Remote access via the Solaire Intelligence app. HA integration is automatic when a broker is present.

HOW IT WORKS

# Simple to live with. Clever where it counts.

A neat box on the wall in your plant room switches the pump, the pool light and the heat pump. It reads water temperature from a stainless-steel probe and uses a current sensor to watch the pump — so it can tell when the filter is clogging or when something's wrong before you do. When SI Gateway is on the network, the ECM score arrives automatically.

## WHAT'S IN THE BOX
## Everything you need

- Weatherproof IP65 SI Pool controller
- Stainless-steel probe in a stainless thermowell
- Sealed cable glands for pump, light, heat-pump
- Built-in pump current sensor
- Simple illustrated setup guide

### WHAT YOU'LL NEED AT HOME

- A pool with a single-phase pump
- A pool light or heat pump (optional)
- A normal 220 V supply in your plant room
- Wi-Fi reaching the plant room

## THE PLAIN FACTS
## Plain-English specs

| Question | Answer |
|---|---|
| Works with | Single-phase pumps, lights, heat pumps |
| Where it goes | Mounted in your plant room |
| Power | Standard 220 V supply |
| Talks over | Your home 2.4 GHz Wi-Fi |
| App | Solaire Intelligence (iOS) |
| Local dashboard | http://si-pool.local |
| ECM | Via SI Gateway — optional |
| Smart home | Plays nicely with Home Assistant |
| Privacy | Local-first — your data, your network |
| Warranty | 12-month limited warranty |
| Made in | South Africa |
